## Proposed Changes

Copy

This paper investigates the relationship between corporate governance and firm performance. We find that firms with stronger governance ~~perform~~ exhibit significantly better ~~performance~~, ~~however~~, but this effect is moderated by ~~the level of~~ institutional ownership. ~~Interestingly,~~ The effect is stronger in firms with higher analyst coverage. ~~It is important to note that~~ Our results are robust to a ~~number of~~ different specifications, including ~~the inclusion of~~ additional control variables and the exclusion of outliers.

SEE BYTEPROOF WORK

## One app, four kinds of writing.

Pick a context to see real proposed changes inside the ByteProof window. You always review them before applying.

Click the screenshot to view it at full size.

## Academic journal (top-tier)

For manuscripts heading to top-tier journals, ByteProof tightens grammar, punctuation and flow while preserving the argument.

### BEFORE

"This paper investigates the relationship between corporate governance and firm performance. We find that firms with stronger governance exhibit significantly better performance, however, this effect is moderated by the level of institutional ownership. Interestingly, the effect is stronger in firms with higher analyst coverage. It is important to note that our results are robust to a number of different specifications, including the inclusion of additional control variables and the exclusion of outliers."

### AFTER

"This paper investigates the relationship between corporate governance and firm performance. We find that firms with stronger governance perform significantly better, but this effect is moderated by

institutional ownership. The effect is stronger in firms with higher analyst coverage. Our results are robust to alternative specifications, including additional control variables and the exclusion of outliers."

BUILT FOR SERIOUS WRITING

## Everything a careful proofread needs.

ByteProof is designed for academic and professional writing, where small mistakes matter.

### Tracked changes in Word

Edits appear as Word tracked changes, so you can review, accept or reject every suggestion.

### Comments when you want them

Optional reviewer comments explain the reasoning behind a change, instead of silently rewriting your work.

### Citations, math & tables protected

References, equations and tables are kept intact, so a proofread never breaks your formatting.

INSIDE THE APP

## Focused, fast, and easy to review.

ByteProof stays out of your way. A small window, a clear diff, and one button to apply.
